# Cyber Resilience for Development –

## Cyber4Dev

**Maurice Campbell**

**Project Leader - Cyber4Dev**

**So what is Cyber resilience?**

**How does this lead into a  
development agenda?**

## **There are three main components:**

- 1. National strategies and implementation plans**
- 2. Capacity building in CERTs**
- 3. International cooperation**

# APCERT 2019

ANNUAL GENERAL MEETING & CONFERENCE

**The project seeks to collaborate with others to build cyber resilience for development through:**

- **Supporting development and implementation of national cyber security strategies**
- **Establishing, training and empowering Computer Emergency Response Teams**
- **Fostering international networks and sharing best practice**

# Together, these components deliver:

- \* Increased awareness of cyber threats
- \* Support to development and implementation of national cyber security strategies
- \* Early warning, information sharing and analysis capabilities
- \* The establishing, training and empowerment of Computer Emergency Response Teams (CERTs)

# APCERT 2019

ANNUAL GENERAL MEETING & CONFERENCE

## The delivery partners: - a blend of technical and capacity building expertise

REPUBLIC OF ESTONIA  
INFORMATION SYSTEM AUTHORITY

Government of the Netherlands

## **Initial engagements**

**Sri Lanka**  
**Mauritius**  
**Botswana**  
**Rwanda**

## **Scoping underway**

**SE Asia**  
**Caribbean**  
**S America**

# APCERT 2019

ANNUAL GENERAL MEETING & CONFERENCE

**Cyber4Dev ‘a programme with global reach – funded under the EU Instrument Contributing to Security and Peace’- IcSP – with a focus on emerging economies and developing countries**

**Many thanks for this opportunity  
to introduce our project!**
